VENUE INFORMATION

The National Centre for Early Music is based in a medieval Grade One listed converted church of St Margaret's which stands in the heart of the City in its own grounds with an attractive and spacious church garden. It was converted in 2000 thanks to a National Lottery grant, which transformed the building into a stunning setting for celebrations. It also runs a year-round music programme promoting classical, folk, world and jazz music as well as hosting the internationally acclaimed York Early Music Festival.

LOCATION

York is situated in the heart of Britain with excellent rail, road and airport links. The train journey takes just under 2 hours from Kings Cross, London, just over 2 hours from Edinburgh and 1 hour 20 minutes from Manchester.

The main NCEM entrance is on Percy's Lane off Navigation Road but there is also access from Walmgate through the church garden. The Walmgate entrance is open for events only and not during normal office hours.

FACILITIES

The National Centre for Early Music has an excellent natural acoustic which can be enhanced by acoustic baffles set high on the walls of the church. Designed and implemented by the country's leading acousticians, Arup Acoustics, the baffles allow the Centre to be utilized for speech, drama and contemporary music as well as early music.

The National Centre for Early Music benefits from a professionally installed cabling infrastructure to facilitate utilising the space for recording.

From the Church to the Control Room there are 36 way of sends and 12 ways of return. For flexibility, this is facilitated by two 24-way 'Veam' multi-core cables.

The multi-core cabling is constructed from high-end 'Evolution EPC OFC' pre-jacketed cabling.

Veam connectors installed at the control room end are terminated in a male 24 pair, and connectors installed at the rear of the church to connect to the control room are terminated in a female 24 pair.

IN THE CONTROL ROOM

The multi-core in the Control Room is terminated in two, wall-mounted, patch boxes. These patch boxes are configured as one fully loaded 24 x male XLR connectors and one fully loaded with 12 x male and 12 x female XLR connectors.

The control room also has the option of terminating the Veam connectors with two 3m XLR tail-sets, similarly configured as one fully loaded 24 x male XLR connectors and one fully loaded with 12 x male and 12 x female XLR connectors.

IN THE CHURCH

Connection between the Control Room and the Church can either be via multiple source boxes

distributed around the church (NB these are situated in under floor dip traps) or by terminating the Veam Multi-cores with dedicated stage boxes at the rear of the hall to match the patch boxes in the control room.

The NCEM has further benefit of warm, dry facilities including kitchens, changing room, overnight parking, wire-less broadband and a friendly, welcoming reputation.

PARKING

There are 6 car parking spaces available for you to use in the venue car park, these include 2 disabled spaces, however this must include parking for your suppliers if required. The closest car park to the NCEM is Peel Street, which is approximately a 4-minute walk away. To find out more about parking go to <http://www.parkopedia.co.uk/>
